Welcome cattlemen and cattlemen!

First off, I want to say THANK YOU to all our customers that have supported us over the last 4 years so we can continue to do what we love and breed good red angus cattle! Also THANK YOU for taking time out of your busy schedule to consider our program and study our catalog! We would love to earn the opportunity to earn your business! Thank you to all our past customers who have given us all the positive feedback! We would like to remind everyone even if the feedback isn't positive, we would love to hear your thoughts and concerns so we can keep moving our program forward to better serve you!

Crazy to think that this is our 5th sale already! Providing top tier customer service is something we strive to offer to our customers! We want you to be happy with your purchase and be profitable at the end of the year! Your investment in our genetics is a big one that makes a long-lasting impact on your herd. When buying genetics from our program you are getting more than just a bull or female, but also gaining a lasting friendship and a partnership built on trust, support, and shared success!

It is a crazy time to be in the cattle business right now with these all-time highs! As I write this, we are seeing kill cows bringing \$1.30+, kill bulls bringing \$1.60+ a lb and fat cattle bringing well north of \$2.00 lb! This is a good time to sell those old herd bulls to trade them in on a younger bull with fresh genetics! With feeder calves selling for around \$2,000 a head and fat cattle selling for around \$3,000 a head it only takes 2-3 head to trade in to purchase your next herd sire that will have a long lasting impact on your herd and bottom line!

Our bulls are developed on a high roughage diet that consists of silage, alfalfa, corn, protein pellet and dry hay. We feel it is very important to keep the bulls full on dry hay, so we offer a choice of dry hay. The bulls are developed in a 5-acre pasture to let them get enough exercise and play around like bulls like to do! Our goal is that these bulls last for our customers, bulls remain sound, problem free and long-time genetic contributors to your herd! Our bulls are not pushed! We shoot for 3 lb a day gain so they are ready to be breeding machines when we deliver them to your ranch! The bulls are parent-verified, genomic-enhanced EPD's, carcass ultrasound and complete performance data! The bulls are on a full mineral and vaccine protocol! Bulls will be semen tested a week before the sale so you can buy with confidence!

The females are fed a TMR ration consisting of dry hay, sorghum sudan grass mix baleage, and ryelage. We also roll out dry bale of hay in the corn field for them to graze and get their exercise. We make the cows walk a ¼ mile back to the yard for water. The bred heifers & cows on the sale are not pampered or sorted off from the main cowherd. The cows get free choice blueprint loose mineral, salt blocks and are on a full vaccine protocol, Johnes tested and cleared and have received guardian for scour protection for the calves! Bred females will be preg checked a week before the sale to confirm they are pregnant!

We feel a solid foundation is very important in the cow calf operation and that it all starts with the momma cow! We focus hard on a maternal foundation, and you will see many of the bulls we use are backed by momma cows that produce well into their teens! Our cattle are bred for balance with a strict culling criteria so they can be productive and have longevity built into the pedigrees to equal profitability! We also cull for disposition, udder quality and structural soundness.

We encourage you to come and take a look at the cows that stand behind this group of bulls! If you would like to come, take a tour through the cow herd before the sale date feel free to reach out anytime! We want you to be 100% satisfied with your purchase that we are giving a \$150 sale credit if you call before the sale to talk about the offering! We can't wait to see you on Saturday, March 15th and if you have any questions don't hesitate to reach out!

Sincerely

Russ, Paula, Austin, Leczi, Emelea, Izaac, Waylon & Wrenley

# SALE INFORMATION

## A&R Red Angus 5th Annual Online Bull & Female Sale MARCH 14-15, 2025

### Sale Contacts

Austin Klaphake .....	320-241-0877
Russ Klaphake .....	320-241-1544
Corey Peters, Red Angus Assoc. of America.....	402-418-2351
Wyatt Lawrence, Hubbard Feed .....	320-391-1430
Bill Schermer, The Stockman .....	641-425-2641

### Sale Location

44831 165th Ave, Holdingford, MN 56340  
From Holdingford, head Northeast out of town 1 mile. Take a left on 165th heading north. 2 miles the farm site is on the left.

### Schedule of Events

#### Friday, March 14th

7:00 AM CDT – Online bidding opens on all lots.

#### Saturday, March 15th

10:00 AM – 4:00 PM CDT – Cattle viewing

12:00 PM CDT – Lunch and Guest Speakers

*Wyatt Lawrence with Hubbard Feeds will speak on replacement heifer selection & development. Tom Czeck or Steve Baldwin with Freeport Veterinary will speak on herd health. Cody Varner with Rich Prairie Livestock will speak on cattle marketing.*

4:00 PM CDT – Online bidding closes on all lots

5:30 PM CDT – Brisket Supper and Social Hour

### Feeding & Delivery

Bulls are kept till May 1st free of charge. After that there will be a \$4/day charge. Free delivery in MN and surrounding states for accumulated purchases of \$3,500 or more (bulls & heifers). Take your bull home sale day and receive \$50 off per bull.

### Herd Health

Freeport Veterinary Service 320-836-2788

All animals are guaranteed healthy on sale day and on delivery day.

### Terms and Conditions

Terms of sale are cash or check. No animals will be released from the farm until full payment is made. Cattle will sell according to the terms and conditions suggested by the Red Angus Association of America.

### Guarantee

All animals are sold to be guaranteed breeders. Bulls will pass a breeding soundness exam before delivery. Open heifers will be confirmed open and breedable before the sale. Bred heifers will be confirmed bred before the sale. In the events of unsatisfactory breeding performance, either a replacement bull or sale credit will be provided, when the defective animal is returned to us in a good state of health.

### Semen Interest

A&R Red Angus is retaining 1/3 semen interest and selling 100% possession in all the bulls unless other terms are state. If semen is collected it will be done at sellers' expense and buyers' convenience.

### Supplement Sheet

A supplement sheet will be available prior to sale day. Supplement sheet will include carcass ultrasound data, scrotal circumference, current weights, and average daily gain.

### Insurance

Animals become the property of the buyer when the sale is over. We recommend getting insurance on the animals.

### Liability

Any person attending the sale does so at their own risk. Neither the owners, or any person connected with this sale assumes any liability, legal or otherwise for any accidents or injuries that happen on the farm.

### Sale Credit

Anyone who contacts us to discuss the bulls will receive \$150 sale credit. Sale credit is only good for bulls. Sale day is always a busy day so we encourage you to call ahead of time so we can go over the offering with you. We want you to be 100% satisfied with your purchase when the sale is over!

### View Catalog & Videos Online:

Arredangus.com and dvauction.com

### Auction Format

The sale will be broadcasted entirely online at www.DVAuction. All lots will close at 4:00 PM CDT on March 15th.

If any lot is bid on with 5 minutes prior to 4:00 PM CDT March 15th, bidding will be extended for an additional 5 minutes on all lots. Bidding will then close when there are no bids placed on any lots for a period of 5 minutes.

### Bidding Procedures

Visit [www.dvauction.com](http://www.dvauction.com) and Register!

1. Create an account at [www.dvauction.com](http://www.dvauction.com) under the create new account tab
2. Apply for bidding by clicking "apply for bidding" in the upper left corner of your screen, at least 24 hours prior to the auction.
3. Tune into the sale and make your purchase  
Contact DVAuction at (402) 316-5460 or [support@dvauction.com](mailto:support@dvauction.com)

Make sure to sign up early so you are ready to bid!

If you don't want to make an account to bid, contact us and we will help you bid!

If you have any questions don't hesitate to call!

### Absentee Bidding

If you are unable to bid during the auction time frame, contact one of the sale contacts and we will gladly help you out.

It's no secret that the commercial guy gets paid by the pounds he brings to town. Scale Crusher is the heaviest weaning weight bull we've ever raised and he sure is to add substantial weight to your calf crop. On test he gained 3.9 lbs. a day ratioing 124 and weighing 1405 lbs. on Feb 2nd! He brings this performance with style, featuring a nice Angus skull, smooth front shoulders, excellent depth of body, extra length of spine, extra bone and stands on a great set of jet-black feet! M419 is backed by one of the most fertile cows on the ranch 9171. M419's flush sister is the top heifer in our replacement pen. Be sure to check her out on sale day as well as Scale Crusher! If you have a herd of mature cows and want to make your next calf crop push down the scale, make sure to go home with Scale Crusher on March 15th!

# RED ANGUS BULLS

If you are looking for 2 bulls to run on a group of cows together take a look at these two Working Class sons! As both bulls pushed down the scale at weaning time with M427 weighing 650 lbs. ranking 1 out of 6 and ratio'd 108! M418 was right behind him at 631 lbs. ranking 2 out of 6 and ratio'd 105! On Feb 2nd both bulls weighed the exact same at 1090 lbs. with M427 having an ADG of 3.2 and M418 having an ADG of 3.6!

M403 has been a standout all summer long! If you are looking for a calving ease option with good growth, be sure to check out M403! M403 came into this world at 69 lbs. and weaned off at 709 lbs. by a first-calf heifer! The 5L Foreman 370E are good cattle. His sons sold well in our sale last year and have made happy customers! This will more than likely be the last Foreman son to sell as we used up his semen and now purchased a Foreman son (Dahlke Working Class 231K) ourselves to use. M403 is out of a 2-year-old Bieber CL Stockmarket E119 daughter that had a beautiful, tight udder and perfect teat placement at calving time last year. M403's granddam on the bottom side is our donor cow Bieber Sam 358Z who is turning 13 years old and will be calving at the beginning of our calving window! M403 is wide topped and stands on black hoof! His dam sells as lot 17!

Stout! That's the first word that comes to mind when walking into the bull pen and laying your eyes on M422. M422 is a calving ease option that is big middle, extra length and easy fleshing. He is out of our old proven donor cow Bieber Rose 478Z who is turning 13 this spring and will be calving at the beginning of our calving window and is setting down a very nice functional udder! We sold 3 full brothers to M422 on our 3rd sale. One was our high seller for \$5,500 to Paxton Carrier in Nebraska. If you are looking for older proven genetics M422 is your bull as his sire is a 2013 model and his dam is a 2012 model! M422's flush sister sells as lot 19.

M431 is the only Bieber Tiberius G413 son to sell and probably the last son to sell! Bieber Tiberius G413 has done a great job for us and past customers have gotten along well with his progeny! If you are looking for a calving ease option, take a look at this guy. With a 75 lb. BW and a CED of 16 he will be a good option for your replacement heifers!

M436 is out of a bull we raised, A&R Tiberius K226. On the bottom side he goes back to our donor Bieber Rose 478Z and on the top side he goes back to Bieber Primrose 456F. This bull's pedigree is full of great cow family's on the top and bottom side including Rose, Primrose, Tilly and Lass. M436 adjusted weaning weight was 680 lbs. off a first-time heifer! His dam 210K sells as lot 19.

If you are looking for a calving ease deluxe bull without sacrificing growth, check out MVP! MVP is a great calving ease option that is smooth made with a little extra length of spine and a little extra frame than our other calving ease bulls! M423 has really turned it on after weaning and weighed 1155 lbs. on February 2nd and gained 3.6 lbs. per day! M423 has the highest CED of 19 in the offering and is still in the top 5% for WW and YW! He is out of some embryos we bought from Ludvigson's frozen genetic sale. If you are looking for an outcross pedigree from our operation, he would be a good option! Semen is very hard to come by on Pie Quarterback 789 and sells for over \$1,000 a unit! Don't miss this top heifer bull prospect!

M407 is a bull that deserves your attention on sale day! We purchased 5 – 158W X Township embryos from Twedt Red Angus hoping for some heifers and we ended up with this guy! M407 stacks 2 of the most famous cows in the Red Angus breed, Bieber Laura 158W and U2 Beauty 113Z! M407 will make you turn your head on sale day with the amount of thickness, depth, and fleshing ability this guy offers in a moderate package! Don't miss this guy on sale day, he will make great herd bull!

Don't miss this guy because he is lot 9! We layout our catalog by sire groups otherwise he would be at the front of the catalog! Bootlegger is a full brother to lot 7 and 8 in our 2024 sale! He is the result of a flush we bought from

Dahlke Red Angus on the great Dahlke Ms. Hilton 263C cow. 263C is one of the great females to walk the pastures at Dahlke Red Angus and the Hilton cow family has put many progeny at the top of many sales! Expect great females out of this phenotypically correct bull that stands on a square jet-black hoof! We have a flush sister that will be calving any day that is one heck of a bred female! Make sure to ask to check her out on sale day! If you are looking to make replacement females, be sure to check out Bootlegger on March 15th!

438M is a bull from our friend Mason Geise. He has caught our eye every time we went to go check out Mason's herd. Mason bought 438M's dam off Dahlke

Red Angus Sale in 2024. 438M's pedigree is stacked with productive long-lasting females like 74G, 263C, and 200Y. 74G is a SAV Raindance daughter that is turning 6 years old with an MPPA of 112 and has already earned herself into Dahlke's donor pen! 263C turns 10 this spring with an MPPA of 107 and is also in Dahlke's donor pen and is the dam of lot 9 A&R Bootlegger M408. 200Y produced until she was 11 and was also a donor for Dahlke's with an MPPA of 106! Keep the females out of this guy!

M434 is the first Integrity 007H son to sell! He is the natural calf out of our donor Bieber Sam 358Z at 12 years old! 358Z did a great job raising M434 up to 677 lbs. at weaning and ratio'd 113! 358Z has raised many good bulls in her 12 years of life earning herself an MPPA of 105! M434 is a maternal brother to our high selling bull last year, lot 1 A&R Rolling Deep L317 who sold to Paxton Carrier for \$16,100! If you are looking for a bull with power, make sure to check him out!

# RED ANGUS BULLS

Lot 13 Dam's Udder

picture-perfect udder, is a deep broody cow that stands on a good foot! M439 has a nice Angus skull, smooth front shoulders with a big middle, tight sheath and stands on a black square hoof like his mother! One of my favorite bulls in the offering! Don't miss him on sale day!

## 14 A&R INTEGRITY M438 Commercial

BD	BW	WW	WR	Feb. 2 Wt.	ADG	CATEGORY	Dam's Age
3/6/24	90	640		1080	3.2		3

M438 is a commercial bull out of Integrity 007H and a commercial Red Angus cow. He has been DNA tested to confirm 007H is his sire. This bull has been a standout all summer long and into the fall where we decided to keep him as a bull. Don't overlook this guy because he is commercial. Normally we don't keep any commercial bulls back but M438 is full of style, with the extra length of body, big middle, and clean fronted bull that stands on a black correct foot! His weaning weight was taken on 9/22/24 and is his actual weaning weight.

M416 is a maternal brother to lot 3 on last year's sale who sold to Bieber Red Angus for \$6,600! M416's dam 994 is a cow we purchased from Rich Red Angus dispersal sale as an open heifer. 994 is an honest cow that sets down a good honest udder and stands on a good set of feet!

# RED ANGUS FEMALES

## 16 6 COMMERCIAL OPEN HEIFERS

This is your chance to own some great commercial heifers out of Dahlke Working Class 231K. These come from our friends, the Brix Family. Last year we Al'd 25 of their top cows in their herd to Dahlke Working Class and they ended up getting 14 heifers! The Brix family didn't keep any back as they let us go in the pen and pick out the 6 heifers we wanted to put on this sale! Don't miss your chance at this great opportunity to get yourself some great replacement females! Selling in groups of 2.

# RED ANGUS FEMALES

Lot 24

**24 2240**

2240 is a 3-year-old commercial cow. She comes from a group of open heifers we bought from Pieper Red Angus to use in our ET program. They all have been good mothers with really good tight udders and perfect teat size and placement. She just fell out of our calving window, so we won't be able to use her in our ET program this year.

**Due April 30th to Bieber Tiberius G413 or A&R Energize L336.**

Lot 25

**25 K127**

K127 is a 3-year-old commercial cow. She set down a great udder last spring. She also fell out of our calving window, so we won't be able to use her in our ET program this year.

**Due May 15th to Bieber Tiberius G413 or A&R Energize L336.**

# Red Angus Guide to EPDS and Indexes

**ProS...** Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

**HB.....** HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

**GM.....** GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

**CED.....** Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

**BW.....** Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

**WW.....** Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

**YW.....** Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

**ADG.....** Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

**DMI.....** Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

**MILK.....** Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

**ME.....** Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

**HPG.....** Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

**CEM.....** Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

**STAY.....** Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

**MARB.....** Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

**YG.....** Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

**CW.....** Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

**REA.....** Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

**FAT.....** Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)
